

Technology Day Award - 2007

M/s. Elpro Energy Dimensions Private Limited, Bangalore has been awarded with Award to SSI Unit.

The award is for Developing and commercializing Energy Tracking and Control System to track the actual energy reduction measures through voltage and control mechanism. The key purpose of this activity is to control and monitor the energy consumption and wastage in the street lighting system with the adaptation of new techniques, incorporation of better energy efficiency and energy management technologies available in the market.

The municipal and local governments are in the process of exploiting the benefits of implementation of such a centralized sophisticated state-of-the-art advanced energy management system developed by the company that includes timely remote switching on / off, dimming during off peak periods, power conditioning, improving energy efficiency of electrical circuit, remote metering, energy theft detection, faculty lights monitoring etc. with an in-built wireless systems based on GSM/CDMA communication technologies.

M/s. Diaonics Automation (I) Pvt. Limited, Nasik has been awarded with Award to SSI Unit.

The award is for designing and developing state-of-the-art "Wireless Digital Addressable Fire Detection cum Prevention System with Centralised Monitoring Station". The company has developed Wireless Digital Addressable Fire Detection cum Prevention System that can be integrated with the BMS, CCTV and Surveillance system, Access Control to provide the operator an instantaneous overview of all systems located with immediate access to detailed information as required.

This wireless revolutionary system is ideally suited for small to large size installations of commercial, institutional and industrial life safety applications. This Fire Soft system offers all the intelligent features of today's most advanced and futuristic world. The integration of Wireless Addressable Software allows the system engineer to customize panels and maximum efficiency for a different application. Monitoring of non-fire related events such as plant, security and processes can also to be catered for by the system.

Awards will be given annually on the **Technology Day i.e. 11th May**
